PRODUCT PORTFOLIO AND FEATURES updated February 2022

FEATURES DESCRIPTION	
2-factor Authentication	Provides additional security through requester verification.
2-way SMS	Supports 2-way SMS communication - send and receive SMS.
Address Book and Shift Roster Management	A function to allow user to create and manage a list of contact persons assigned to various working/shift hours.
CPU, RAM, Hard-disk Check	A monitor on the server resources utilisation in terms of CPU, RAM and hard disk.
Email Filtering Function	Allows user to configure and filter the email messages by processing via preset criteria.
Email (SMTP)-to-SMS	Able to receive normal email (SMTP) and convert to SMS text messages.
HTTP Post to SMS	Able to receive HTTP Post string messages and convert to SMS text messages.
ICMP, TCP, URL Check	A network monitor to check (via PING, Port and URL) an IP and if there is no response, an SMS will be sent.
Integration to LDAP/AD	Able to integrate to user's LDAP and AD.
JDBC to SMS (send SMS)	Able to use ODBC to access information from user's database and connect to sendQuick gateway to send SMS.
Keyword Management (Interactive SMS)	A unique keyword will be routed to other specified application via HTTP Post, email or others.
Mobile Instant Messenger (MIM)	Integration with social messengers and collaboration tools – Whatsapp, FB Messenger, WeChat, LINE, Viber, Telegram, Slack, Webex, MS Teams.
On-Demand SMS	Able to send SMS to check on server up/down status and initiate service restart or server restart and shutdown.
SMS One-time Password/Soft Token	Used in conjunction with 2FA.
SMS Quota Manage	Configurable on Modem to set SMS SIM prepaid quota, upon reaching quota limit, SMS cannot be sent from server.
SNMP Trap Filtering function	Allows user to configure and filter the SNMP Trap messages by processing via preset criteria.
SSL (HTTPS)	A secured SSL channel can be connected.
Support Multiple Modems	Can connect (physically) to multiple modems, up to 32 units SSL (HTTPS).
Syslog Filtering Function	Allow users to configure and filter the Syslog message by processing via preset criteria.
Web Interface for Users to send SMS	Additional module where user can access to send and receive SMS messages.
Web OTP	A 2FA using SMS OTP for web-based applications, with API integration capabilities (HTTP Post, SOAP and XML).
Windows WMI Check (process & service)	A monitoring function to check on the process and services availability of Windows Management Instrumentation (WMI).
