

## OUT OF BAND SMS OTP FOR 2FA SECURE ACCESS

sendQuick series of appliances from TalariaX presents a portfolio that offers clientless and tokenless secure remote access for staff or customers via 2 Factor Authentication (FA) with SMS One Time Password (OTP). 2 Factor Authentication with SMS One Time Password provides an added layer of security as even if a hacker gains access to one's login ID and password, an addition password will be sent to the user's mobile phone to further verify a user's identity.

2-Factor Authentication SMS One Time Password

sendQuick is an appliance based SMS gateway for automated 2 Factor Authentication (FA) with SMS One Time Password (OTP). The 2FA SMS OTP feature is a proven solution that is deployed in more than 20+ countries across several industry verticals, many being Fortune Global 500 companies from industries that includes banking & finance, government, petrochemical, healthcare, manufacturing and retail - eliminating events on security compromise.

sendQuick ConeXa can integrate seamlessly to existing intranet applications as well as databases for fast and easy deployment. In addition, since mobile phones are often common existing personal devices, a company would not need to spend much resources in educating end users on how to apply the 2 Factor Authentication to gain remote secure access.
